JAPANESE STEEL DIGITAL HAIR CLIPPER

ALL OVER CUT

1. Starting at the nape of the neck, hold the clipper with the teeth of the clipper pointing upwards, ensuring that the comb guide is resting flat against the head.
2. Slowly move the clipper upwards and outwards through the hair towards your crown, against the direction of the hair growth.
3. Once the desired length is achieved at the back of the hair, start clipping the top and sides.
4. Hold the clipper to the front of your hair with the teeth pointing towards the back of your head, and move the clipper towards your crown. Repeat as necessary, moving in rows from the front and the sides of your head to the back.
5. You should achieve an even length cut all over your head.

OUTLINING

1. To tidy up the edges around your cut e.g. neckline and sideburns, detach the comb guides.
2. Hold the appliance upside down, so the front of the clipper is facing towards your head.
3. Hold the clipper straight on your sideburns or neckline and move the clipper downwards. This will give you a clean, smooth finish.
