STEAM LUSTRE STYLER

The Steam Lustre Styler is powered by a 360° surround steam technology that delivers effortless, super-smooth results in a single pass. Its smooth gliding 36mm wide ceramic plates and removable comb makes straightening easy on thicker and naturally curly or afro hair types.

STEP BY STEP

1. Ensure hair is dry and combed through to remove any tangles. Divide the hair into sections and select your preferred heat setting.
2. There are 2 steam settings to choose from; low and high. To activate the steam

technology on the low setting, press the button marked ‘**’**. The first LED light will light up, close the plates and steam will start emitting from the appliance.

3. To select the high steam setting simply press the ‘**’** button again, the second LED light will light up.
4. Place a section of hair between the straightening plates, close to the roots.
5. Hold the hair firmly between the straightening plates and slide down the length of the hair from root to tip. Repeat for each section of hair.
